WHAT IS CLAIMED:

1. A method comprising:

receiving a request corresponding to a specific content;

reviewing a record associated with the specific content in response to the request:

selectively transmitting a confirmation for the request based on the reviewing; and

performing the request based on receiving the confirmation.

10

5

- 2. The method according to Claim 1 wherein the reviewing further comprises using a preference corresponding with the request to determine whether the confirmation is utilized.
- 15 3. The method according to Claim 2 wherein the preference includes a criteria for checking the record wherein the criteria is based on the request.
 - 4. The method according to Claim 1 wherein the reviewing further comprises reviewing a second record associated with a second content.

20

5. The method according to Claim 1 wherein the specific content includes one of a photograph, music, a document, and a video.

- 6. The method according to Claim 1 wherein the request includes one of saving the specific content, deleting the specific content, modifying the specific content, and printing the specific content.
- 5 7. The method according to Claim 1 further comprising storing the preference in a storage device.
 - 8. The method according to Claim 1 further comprising storing the record in a storage device.
 - 9. The method according to Claim 1 wherein the confirmation asks for authorization for the request.
 - 10. A system comprising:

10

means for receiving a request corresponding to a specific content;

means for reviewing a record associated with the specific content in response to the request;

means for selectively transmitting a confirmation for the request based on the reviewing; and

20 means for performing the request based on receiving the confirmation.

detecting new content;

comparing the new content with existing content;

forming a new record having at least one field representing the new content;

automatically completing the field based on the comparing; and storing the record within the storage module.

- 12. The method according to Claim 11 wherein the new content includes oneof a photograph, music, a document, and a video.
 - 13. The method according to Claim 11 wherein the field includes one of a content title field, a file size field, a file description field, a related content field, a location content field, and a date saved field.

14. The method according to Claim 11 further comprising updating existing records associated with the existing content based on the new record.

- 15. The method according to Claim 14 wherein the updating further comprises reviewing the field within the new record for related content.
- 16. A system comprising:

means for detecting new content;

means for comparing the new content with existing content;

means for forming a new record having at least one field
representing the new content;

means for automatically completing the field based on the comparing; and

means for storing the record within the storage module.

17. A system, comprising:

5

15

20

an interface module configured for receiving a request specifying content;

a storage module configured for storing a preference wherein the preference corresponds to the request and includes at least one criteria for performing the request; and

a review module configured for analyzing the content and a corresponding record in light of the request and the preference and determining whether the request is performed.

- 18. The system according to Claim 17 further comprising a capture module configured to identify the content.
- 19. The system according to Claim 17 wherein the content includes one of a photograph, music, a document, and a video.

- 20. The system according to Claim 17 wherein the interface module is configured to provide a confirmation the content fails the criteria for performing the request.
- 5 21. The system according to Claim 17 wherein the storage module is configured to store the record.
 - 22. The system according to Claim 17 wherein the storage module is configured to store the content.

10

- 23. The system according to Claim 17 wherein the request includes one of saving the content, deleting the content, modifying the content, and printing the content.
- 15 24. A computer-readable medium having computer executable instructions for performing a method comprising:

receiving a request corresponding to a specific content;
reviewing a record associated with the specific content in response
to the request;

20 selectively transmitting a confirmation for the request based on the reviewing; and

performing the request based on receiving the confirmation.
